

NYSGISA Education Committee Meeting Minutes

Sept, 2021

Attendance: Paula (Chair), Susan, Mike, Eileen, Jessika, Jonathan

Check in on start of semester challenges. 1st week ESRI licenses timed out in at least some SUNY schools.

Charlie Fitzpatrick's K-12 materials for teachers was discussed and that it could be made available to members, it's on our resources list, but we haven't gotten this list made available.

We need/want to capture who uses the resources we post so we have a better idea how to serve our difference communities.

Creating access to a mentors' page for us, or to the existing ESRI one.

Create a way to post special programs so people can get those things highlighted.

We need an idea generator.

Could we find academics through Librarians or IT managers (no to former)

Jonathan mentioned resources in Westchester County for geo spatial resources in Spanish. A good thing to make available.

In our discussion about what we want to work on as a committee number one is getting us (educators of all stripes) treated better within the organization.

Find out or make clear all the different ways GIS is used in different jobs (part of our podcast)
